# Drilling Down-Determine Differences within Communities

# A Few Examples of Uses of CA

## Location of Services

The Division of Child, Youth and Family Services, Department of Health and Community Services has used the Community Accounts to identify Communities “at risk” to determine where Family Resource Centres would be located. Their Partners in Labrador, the Strategic Social Plan Regional Steering Committee, used the Community Account’s dynamic output features to determine the best location in that region, and as a result, two Family Resource Centres were established.

## Economic Development

The Schooner Regional Development Corporation used the Community Accounts in developing its annual strategic plan for the corporation, assisting commercial clients with business plans and helping communities and community based organizations to develop economic development projects and funding proposals.

## Infrastructure Decisions

Regional school boards used the demographic information on the Community Accounts that provided population projections, to make decisions regarding school amalgamation as populations of 5 to 18 year olds declined.
